EDUCATION

University of California, Berkeley

Graduated May 2025

Bachelor's of Arts, Data Science

Relevant Coursework: Introduction to Machine Learning, Principles and Techniques of Data Science, Computational Structures in Data Science, Data Structures, Econometrics, Linear Algebra & Differential Equations, Concepts of Probability, Foundations of Data Science

PROFESSIONAL EXPERIENCE

57Blocks | San Francisco, CA

Research Analyst

November 2025 - Present

- Built out a company-wide top-of-funnel motion from zero to one with little instruction, leading to a consistent cadence of qualified leads.
- Automated outbound email sequencing w/ OpenClaw and Claude Code, and attended conferences like GTC and AI+ Renaissance 2026.
- Drove part of Liftoff's GenAI initiative as de-facto PM; shipped self-serve platform for advertisers to generate ads with Seedance 2.0.

Copado, Inc. | San Francisco, CA

Support Engineer

June 2025 - August 2025

- Automated support case routing with Salesforce Omni-Channel, improving case triage and replacing spreadsheet-based case assignment.
- Implemented real-time performance dashboards in Salesforce, giving leadership insight into case ownership and resolution times.
- Developed an AI-powered outbound call system to collect missing case information from customers, reducing time-to-resolution delays.

Product Management Associate

August 2024 - December 2024

- Delivered a Slack app integrated with the Copado AI Platform, enhancing Salesforce record creation and sprint planning directly in Slack.
- Revamped the product documentation that powered our AI knowledge base, improving AI accuracy and customer support operations.
- Created a data governance framework for product documentation by assigning ownership and tracking metrics, reducing operational risk.
- Worked cross-functionally to define Slack app requirements, guide developer implementation, and deliver a smooth installation process.

Intern, Product Management

June 2024 - August 2024

- Helped launch an AI platform supporting 5 agents for Salesforce DevOps, which earned the 2024 Salesforce Partner Innovation Award.
- Partnered with senior managers on GTM strategy, pricing, and packaging; delivered demos that boosted AI agent usage by 12%.
- Conducted interviews with beta customers to hear feedback and understand how our product was being used in order to improve it.
- Led a project to scrape Salesforce and ServiceNow documentation data and ingest it into our Retrieval-Augmented Generation systems.

University of California, Berkeley – Data Science Department | Berkeley, CA

Undergraduate Machine Learning Researcher

August 2023 - December 2024

- Contributed to FactGrid Cuneiform: a project to digitize and translate ancient cuneiform texts for machine translation use cases.
- Consolidated fragmented datasets from historians, archives, and research notes into a centralized knowledge graph for AI training.
- Experimenting with fine-tuned large language models to enhance model performance, prevent overfitting, and generalize to unseen texts.

DATA C88C: Computational Structures in Data Science | Berkeley, CA

Course Staff – Teaching Assistant

August 2023 - May 2024

- Gave support to over 120 students during lab, office hours, and discussion sections when they needed help with course content.
- Tutored students on concepts related to object-oriented programming such as data structures, abstract data types, and efficiency.
- Assisted the course instructor with teaching as needed, including planning course content and designing/proctoring exams.

NOV Inc. | Houston, Texas

Data Science Intern

May 2023 - August 2023

- Automated service plate data entry with a mobile app feature built on Microsoft Azure, refining workflows for ~20 engineers at 8 plants.
- Provisioned cloud resources with Terraform, establishing scalable infrastructure and streamlining CI/CD workflows in Azure.
- Resolved API errors using Postman and Azure API Management, debugging 500/400 issues and ensuring production reliability.

PROJECTS

Pittsburgh Pirates Baseball Club | Consulting Project | Sports Analytics Group at Berkeley

- Led a team of 4 students to analyze youth-focused promotions and declining youth attendance, collaborating with front-office staff.
- Analyzed ticket sales, attendance patterns, and fan engagement metrics to identify drivers of underperformance in target demographics.

LEADERSHIP & EXTRA-CURRICULARS

2023 Hoover Institution Summer Policy Boot Camp: Recipient of the Distinction Award from Dr. Condoleezza Rice
